

ARE YOU
AWARE OF
THE LETHAL
EFFECTS OF
THE
DICLOFENAC?
BE A
#DICLOHATER

WHAT IS THE DICLOFENAC?

Diclofenac is a nonsteroidal anti-inflammatory drug (NSAID) usually used in beef; cows, horses or hogs and also in humans.

HOW DOES THAT AFFECT?

Veterinary use of the drug diclofenac—used in the treatment of livestock—has been linked to the collapse of vulture populations throughout South Asia.

WHAT IS OUR GOAL?

Our main goal is to change the composition of the pharmac in the way that the vultures are no longer harmed.
